**LikeQuick PPT Remote Registration Code For
Windows**

LikeQuick PPT
Remote is a very
simple utility that
provides a solution
to the problem of
controlling
PowerPoint
presentations from a

mobile phone
connected to the
same Wi-Fi network.

LikeQuick PPT
Remote can be set
up in seconds, as
you just need to
place your
presentations in the
specified folder and
click the “Start Now”
button. The server is
created
automatically, and

you are provided with a local IP address. Once that is done, you can connect to the URL from your phone's web browser, open the presentations on your PC remotely and advance through the slides. You can switch to full-screen mode, and the two largest

buttons are used to advance to the next slide or move to the previous one. Unlike other PowerPoint remote control apps, LikeQuick PPT Remote includes a full-screen mode that you can use to access your presentation remotely. You can choose any file

stored in the application's directory and open it directly from your phone, so you can control presentations even when your device is connected to a different network. You can also save presentations on your phone and view them on the

computer using a Wi-Fi connection when you can't be in the office. Main Features: To install LikeQuick PPT Remote on your computer, download the.exe file and extract it to the desired folder. In the Start menu, type ncpa.exe and the program will begin

downloading the files for the application. Once the download is completed, open the directory and double-click the .exe file to launch the program.

Follow the instructions on the screen and accept the default settings.

Switch to the Text file option to create

the LikeQuick PPT Remote Server. Click Next, use the folders for temporary files or a different location, and check the box to ignore any file modifications made by the application and click Next. Click Finish and you will be prompted to view the server name you

want. Accept the default setting and click OK to launch the server. You can choose any folder to store your presentations and click Open or Browse to locate it. Once the server is launched, double-click the.html file in the server's folder. Accept the default setting and

click OK to launch the server. You can control PowerPoint presentations from a mobile phone by opening the LikeQuick PPT Remote application on your mobile device. b7e8fdf5c8

LikeQuick PPT Remote Download [Mac/Win]

- Launch a web server to open all presentations stored in the application's directory.
- Tap the large buttons on your mobile phone to control the presentations, advance to the next slide or move back

one. • In full-screen mode, the application hides the controls of the mobile device. • In Windows Phone 8/Windows 8, the slideshow is controlled by the OS, which includes slide timings and the ability to long press the screen. • Allows you to select a

PowerPoint slide
from any folder on
your phone. · Allows
you to
open/navigate
different
presentations at the
same time. · Allows
you to play around
with the slides, save
your changes, and
return to the original
presentation. ·
Allows you to make

changes to the slides on your phone while the PC is performing other tasks. · Allows you to share the presentation with your contacts on your phone. · Allows you to copy the presentation into your phone, and navigate to it whenever needed.

LikeQuick PPT

LikeQuick PPT

Remote allows users to control

PowerPoint presentations from mobile devices. How to Use LikeQuick PPT Remote: Step 1: Launch the LikeQuick PPT Remote software on your computer. Step 2: Search the applications folder for PowerPoint presentations on the local network and

add them to the LikeQuick PPT Remote application. Step 3: Launch the LikeQuick PPT Remote application on your mobile device. Step 4: Use the application's controls to move to the next or previous slide, or to full-screen mode, or close the

presentation.

LikeQuick PPT

Remote Features: •

Switch to full-screen

mode. • Move to the

next slide. • Move to

the previous slide. •

Close the

presentation. • Exit

the presentation. •

Mute the

presentation audio.

• Select a Microsoft

PowerPoint

presentation from the application's "Presentations" folder. • Use the mobile device as a remote presentation control. LikeQuick PPT Remote does not require any additional installations or heavy on-screen controls, as it is limited to using only

the phone's own system interface. As such, it is very easy to use and it does not take much of your time or focus to get started. **WPAD - This is a Winsock loopback policy. When Winsock is configured to use a loopback address, it accepts TCP and UDP connections on

loopback addresses; i.e., any TCP or UDP connection where the destination is 127.0.0.1 or the IP address of the loopback interface. Example: winsock policy loopback addresses Use the Winsock Configuration Assistant to add the policy to the

operating system
policy store and
reboot the system.
To add the winsock
policy to the system,
complete the
following steps. 2.
Select Advanced
Settings from the
Edit menu and select
the Winsock
Configuration
Assistant from the
task list. 3. In the

Winsock
Configuration
Assistant, select Yes
to save the policy
and reboot the
system. Solution 1:
Windows XP Open
the Registry Editor
and navigate to the
following location: H
KEY_LOCAL_MACHIN
E\SYSTEM\CurrentCo
ntrolSet\services\Tcp
ip\Parameters

Create a new DWORD value called StoreInCtxt, change the data to 1, and restart the computer. Solution 2: Windows
